PROFILE

IT infrastructure and systems specialist and Memorial University of Newfoundland MSc Computer Science student with five years' experience keeping users, devices and enterprise infrastructure running. Currently providing remote IT consulting at Sabaoth across hardware, networks, firewalls, and Microsoft 365/Google Workspace in Canada. Previously engineered the multi-WAN satellite link and GPON fibre backbone across a 1,200-acre industrial park in Ghana. AWS certified and focused on network security and intrusion detection.

CORE SKILLS

IT consulting & remote support · Microsoft 365 & Google Workspace · Routers, switches & firewalls · MikroTik RouterOS & multi-WAN · Fibre / GPON distribution · Starlink deployment · Huawei enterprise switching · Proxmox, Linux & Docker · Odoo and ERPNext administration · Network segmentation & firewall policy · VPN (WireGuard, Tailscale) · CCTV / IP camera systems · AWS & Google Cloud · Technical documentation

EXPERIENCE

Information Technology Consultant

SABAOTH · Alberta, Canada (Remote, freelance) · September 2026 – present

– Provided remote IT consulting and technical support for hardware, software, and network issues, ensuring seamless connectivity.
– Configured and troubleshot routers, switches, and firewalls, enhancing infrastructure reliability for clients.
– Supported Microsoft 365 and Google Workspace, managing user accounts and permissions for optimal functionality.
– Assisted with cybersecurity measures and system maintenance, contributing to a secure IT environment.

Lead IT Officer

Greenhouse International Development Group Ghana Ltd. · Bright Industrial Park, Ghana · October 2023 – August 2026

Led IT support for a 1,200-acre industrial park and its branches and factories — end users, POS, servers, CCTV and the site-wide network — supervising a four-member team.

– Supervised a four-member IT team supporting staff across the park, head office and branches — around 36 staff per branch or factory — for hardware, software, printers, accounts and access, from triage to resolution.
– Personally installed and supervised CCTV and Starlink deployments across 47 branches and factories in Ghana — 15 to 45 cameras per site with remote viewing for management, and Starlink brought up in about two hours per site.
– Supported POS setup, staff training and equipment tracking across 23 Bright Afrimall sales points, with remote fault resolution.
– Managed the handheld PDA estate used for stock and operations — provisioning, application deployment and day-to-day fault resolution.
– Designed and deployed the park's fibre backbone — installing and terminating overhead fibre-optic cable — carrying CCTV footage and POS data from factories and remote buildings to head office, and distributing internet back out to the factories.
– Built the site's internet capacity by aggregating eight individually mounted Starlink terminals into a MikroTik router as eight WAN links, feeding a Huawei S5735 enterprise switch and a GPON distribution layer with 1:4 splitters across the fibre panel.
– Gated administrator access to internal systems behind a VPN on the MikroTik router, and segmented the network with VLANs and firewall policy to keep PII off the public internet.
– Extended coverage beyond the park boundary with point-to-point wireless links and VPN tunnels, keeping a public-IP path as a backup remote-access route alongside the VPNs and MTN fibre.
– Installed and managed indoor and outdoor access points with centralised controllers, covering offices, factory floors and open ground.
– Administered 3 physical servers and around 9 VMs on Proxmox, plus 2 production and 3 development/test servers online — Odoo, OpenMAINT, Tailscale, OPNsense, file and proxy services and DNS-level filtering, using Docker and Portainer.
– Ran bare-metal backups every Sunday evening and event-triggered automated POS and database backups, using Proxmox VE backups and Proxmox Backup Server.
– Migrated on-premises email to Microsoft 365, moved a local POS server to AWS, and transferred company websites from Namecheap to Hostinger.
– Administered NingDun Identity Domain Management for a year — directory services, Windows authentication, computers and password policies.

– Ran IT stores and asset control in Odoo: inventory, stock movements and equipment issue for the IT warehouse.
– Supported the survey team by converting CAD site plans into OpenStreetMap data with JOSM, giving the park an accurate digital basemap.
– Acted as departmental supervisor in the Engineering & Design Manager's absence, and led technical interviews for IT Officer hires.

Remote IT Consultant

Nii Plants Group · Ghana · 2021 – present

– Provide remote IT administration and technical support for company digital infrastructure, explaining solutions to non-technical stakeholders.
– Manage company websites, domains, hosting platforms, SSL certificates and business email systems.
– Perform website maintenance, security updates, performance optimisation and troubleshooting.
– Support digital platforms used across hospitality, transportation, logistics and real estate operations.
– Manage online services and ensure availability of critical business systems.
– Develop websites and support SEO for the group's businesses.

Information Technology Specialist

Prop-Tis GH Limited · Ghana · April 2022 – September 2023

– Developed and maintained the WordPress real-estate listing platform, supporting property publishing and the customer search experience.
– Maintained hosting, backups and website security to protect business information, and resolved staff hardware, software and connectivity issues.
– Coordinated an eight-member multidisciplinary team on website and digital content delivery, including newsletters and SEO reporting.

Project Assistant

Kwaaba Foundation · Ghana · March 2021 – February 2022

– Coordinated project plans, timelines and personnel allocation for health and community initiatives.
– Managed office operations, documentation control, meetings, and stakeholder communications.
– Designed and developed websites, graphic content, and social media communications for project branding.

Information Technology Specialist Intern

Origin8 Limited · Ghana · April 2020 – March 2021

– Designed and maintained websites for client and internal projects.
– Provided staff IT support for hardware, software, and network issues, minimizing downtime.
– Integrated digital tools and technical solutions into marketing campaign deliverables.

Information Technology Specialist Intern

GCB Bank Limited · Amasaman, Ghana · October 2019 – January 2020

– Supported Windows and Linux servers, user and email accounts, access privileges, file servers, printers and VPNs.
– Troubleshot hardware, CCTV and software faults for staff, minimising banking disruptions.
– Maintained and repaired currency counters used across banking operations.
– Assisted customers with account inquiries and service requests.
– Used Google Forms and other digital tools to collect and process information efficiently.

Management Information Systems Intern

Volta River Authority · Aboadze, Ghana · September 2017 – January 2018

– Configured server and client operating systems, and supported Windows and Linux servers, accounts, permissions, file services and VPNs.
– Resolved computer, printer, network and CCTV issues for staff.

Sales Executive & Hardware Repair Technician

RichWorld Mobile Devices · Ghana · June 2016 – September 2017

– Component-level mobile hardware repair, inventory records and after-sales support.

EDUCATION

MSc, Computer Science
Memorial University of Newfoundland, St. John's, Canada · September 2026 – November 2028 · Course-based, network security and intrusion detection

BSc, Information Technology
Kwame Nkrumah University of Science and Technology, Ghana · 2022 – 2024 · Second Class Honours, Upper Division

Higher National Diploma, Information and Communication Technology
Takoradi Technical University, Ghana (NABPTEX) · 2017 – 2020 · Second Class, Upper Division

Certificate II, Electrical Engineering Technology
Twumasi Boateng Technical Institute, Ghana · 2016 · Ghana Education Service / NABPTEX

CERTIFICATIONS

Intermediate First Aid CPR C/AED (Standard)
St. John Ambulance · September 2026 – September 2029 · Credential 1561996292

Sexual Violence Awareness and Prevention
Memorial University of Newfoundland · September 2026

Fire Safety, Prevention, Evacuation and Basic Firefighting
Ghana National Fire Service · September 2025 · Amasaman Fire Station

Foundations of Cybersecurity
Google (Coursera) · August 2026 · Credential KVMKSBBS97UR

AWS Certified Cloud Practitioner
Amazon Web Services · July 2024 – July 2027 · Credential 22299d8c82674d9fa309d05ac2c872a6

ALX Cloud Computing (Cloud Practitioner course)
ALX Africa, powered by AWS Academy · July 2025 · Certificate HrRxBsfZLz

ALX Professional Foundations
ALX Africa · April 2025 · Certificate 59XFYHsMer

The Fundamentals of Digital Marketing
Google Digital Skills for Africa · October 2020 · Certificate 58H 54V V9H

TECHNICAL

Consulting & Support Remote IT consulting · Hardware diagnostics and repair · Windows and Linux desktops · Microsoft 365 · Google Workspace · Printers and peripherals · User accounts and access · User training

Retail / field POS configuration and rollout · PDA provisioning · Multi-site deployment · CCTV / IP cameras · Asset and inventory control (Odoo)

Network MikroTik RouterOS · OPNsense · Routers and enterprise switches · Multi-WAN aggregation · Starlink · Fibre / GPON · Huawei S5735 · VLANs and firewall policy · Point-to-point wireless · WireGuard / Tailscale · APs

Security Network segmentation (VLANs) · Firewall policy and hardening · VPN-gated admin access · DNS content filtering · PII and data protection · Access and identity management · SIEM fundamentals · Threat analysis

Servers Windows Server, Active Directory and Group Policy · Proxmox and Proxmox Backup Server · Linux administration · Docker and Portainer · Odoo · OpenMAINT · Frappe / ERPNext · DNS filtering · Backup and recovery

Cloud / web AWS (IAM roles, policies, MFA) · Google Cloud · Cloudflare · Domain and DNS · Email hosting · WordPress · cPanel · PHP / MySQL · HTML, CSS, JavaScript · Git

Other JOSM / OpenStreetMap · CAD to GIS conversion · Structured cabling · Technical documentation · Project coordination · Remote work
